New York University, New York, New York

May 2020

Bachelor of Arts in Econometrics; Minor in Business Studies (University Honors Scholar)

AI Internship: Assisted faculty in developing software to measure impact of AI bots on U.S. presidential election predictions

EXPERIENCE

KARGO

New York, USA

MBA Product Intern, Karlo

June – Aug 2026

Supported the Sep 2026 launch of Karlo, Kargo's agentic AI platform for digital advertising

- Built and tested Kera's conversational support agent in Zendesk, automating how customer issues are captured, structured, and routed to help the team scale support as adoption grows
- Synthesized insights from 200+ early-user support requests across onboarding, access, and product usage into launch-ready content, self-service workflows, and product feedback, helping scale customer education ahead of September GA
- Built Kera's launch operating model across 3 teams and 3 core workflows, standardizing ownership, escalation, and cross-functional handoffs to replace ad hoc processes with a repeatable operating system

Product Operations Lead

2024 – 2025

- Led the integration of a predictive AI model into Kargo's reporting product, translating model outputs into self-serve customer insights that improved campaign performance by 25% during pilot
- Designed and ran a cross-functional experiment to test a dynamic creative optimization product, using campaign and funnel data to validate a 20% ROI lift and build the business case for broader rollout
- Built an automated performance reporting workflow integrating data from 3 sources via APIs, cutting manual reporting by 4 hours per week and giving teams faster visibility into performance for optimization decisions

Senior Campaign Manager, Paid Social

2023 – 2024

- Managed and optimized \$3M+/month in digital campaigns across Meta and TikTok for DTC, CPG, and retail advertisers, testing creative, messaging, and audience strategies that improved ROAS by 30%
- Reallocated paid social strategy from 100% lower-funnel spend to a 60/40 upper- and mid-funnel mix based on acquisition data, driving a 65% increase in new users across retail brand partners
- Designed and ran creative A/B tests to identify the hooks, formats, and messaging patterns driving performance; translated findings into campaign recommendations and future experimentation strategy

VIDMOB, INC.

New York, USA

Strategist → Senior Strategist

2021 – 2023

- Conducted 70+ customer discovery interviews, demos, and workflow observations to uncover adoption barriers and user needs; translated insights into ICP segmentation, positioning, and product recommendations that increased feature conversion by 40%
- Developed GTM messaging for Johnson & Johnson by translating customer needs and performance data into clear value propositions, supporting product adoption, 162% net revenue retention, and \$1M+ in YoY account expansion
- Built marketing investment reviews for enterprise leaders to evaluate channel performance and guide budget allocation and scale/sunset decisions, contributing to a 25% increase in paid social investment at one account
- Identified gaps in customer analytics workflows and partnered with Product and Engineering to prioritize and pilot 7 customer-facing features, increasing adoption by 30%
- Designed a human-in-the-loop workflow for Johnson & Johnson that combined AI outputs with qualitative judgment, improving campaign performance by 35% and making AI-driven recommendations more actionable for brand teams
